

Wire Suspension Kit Max 15Kg

Lighting Solutions

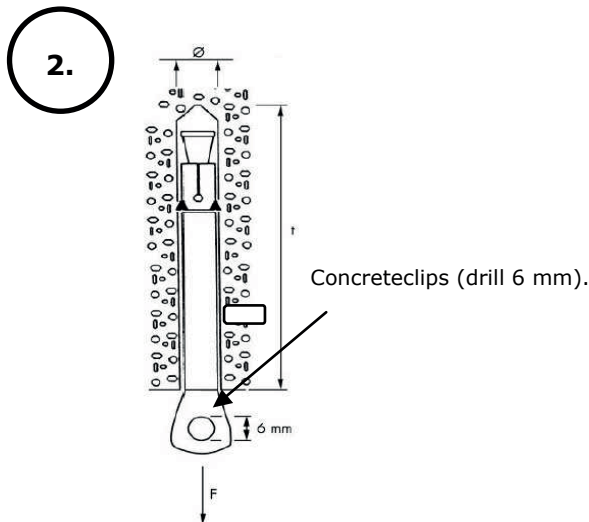

Wire
Suspension Kit Max 15Kg

Contains 10 kit.

A complete wire suspension solution for all kinds of ceiling.

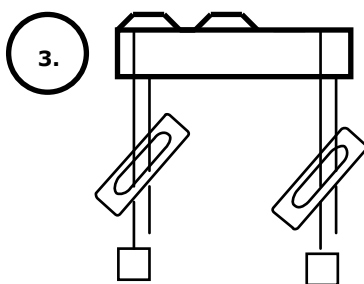

1. Hanging from sheet metal, plaster, wood and other sheet material. Drill a 5 mm hole and pull the wire through the washer. Then push it through the hole in the ceiling.

2. Hanging from concrete. Drill a 6 mm hole whit a deep around 30 mm, but make a test hole first. Push up the concrete clips into the ceiling with a hammer. Pull the wire through the washer and then through the clips.

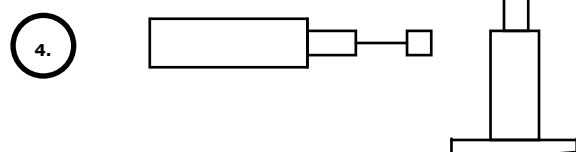

NOTE!
Make sure the ceiling attachment can handle installed load with 5-fold safety.

3. Hanging around ventilation tubes or similar. Pull the wire through the washer then around the tube and back through the washer.

4. The gripper is very fast to adjust. Push the wire through the gripper For adjust it upwards just pull the wire downwards. For adjust it downwards, push the peg down and adjust. The gripper is fixed on a "snap on" bracket for the track and gives a fast & simple installation. Install the gripper where you want it on the track. Lock position by turn the gripper attachment on the track.

Gripper on a "snap-on" bracket
